

Dear Parents,

As part of the **StratoStar weather balloon launch and STEM Day**, we will be helping all students, grades K-4, to build a simple water bottle rocket that they can see launched, and retrieve after flight, at the upcoming event on **Saturday, April 27, 2019!**

We are asking that each student bring in a 16.9 -20 oz. Soda bottle (**It HAS to have held a carbonated beverage- plastic water bottles will NOT work**).

Please send in the bottles, to your child's homeroom teacher, as soon as possible.

See you all at BLAST off!

Michele Deeb
K-4 Enrichment Teacher
